accessories

DeWitt accessories make installation of DeWitt product lines not only easy, but also strong and long lasting. Use DeWitt accessories to secure all of your lawn and garden projects.

Down to earth protection. Down to earth results.

DeWitt Anchor Pins

DeWitt Anchor Pins properly secure and anchor landscape fabrics, ground coverings and drip irrigation tubing. These special steel pins are angled at their ends for faster and easier installation. Use Anchor Pins to permanently and professionally anchor all of our fabrics.

DeWitt Edge

DeWitt Edge is a great solution for almost any area where mulch needs to stay in, and grass needs to stay out. Made from flexible, high-strength material, this edging offers extreme versatility for home-owners and landscapers alike.

See installation ideas and instructions on the next page.

EDGE20	BULK 20' LANDSCAPE EDGING (INCLUDES 5 PIECES OF 20FT STRIPS)	326		18		1	5

DeWitt Edge

DeWitt EDGE

The following simple steps can be repeated on any landscaping project such as shrubs, flowerbeds, vegetable gardens, along walkways, or wherever edging is desired.

Place a permeable landscape fabric, such as DeWitt Weed-Barrier® Pro, around the plant and secure with anchoring Pins.

Arrange DeWitt Tree Ring around your plant bed or tree, defining the boundary.

Adjoin the ends to form the desired shape. Trim excess fabric from the outside of the edging.

DeWitt Edge eliminates trimming!

The DeWitt Edge and the DeWitt Tree Ring use the same simple steps to give the edge to your next landscape project.

Give your lawn an edge!

- No trimming necessary – mow right next to DeWitt Edge for a finished look
- No digging, trenching or pounding
- Resists upward movement in freezing temperatures. Once installed, DeWitt Edge stays where it belongs.
- No special tools are needed
- No connectors – it slices together
- No cracking or splitting – withstands foot or mower traffic

Use DeWitt Edge with Weed Barrier® Pro and expect these benefits:

- No weeds inside DeWitt edging
- No digging out sod or existing weeds
- An increase in percent survival and growth of plants
- Healthier plants

With DeWitt Edge you eliminate trimming, and with DeWitt Weed-Barrier® Pro you eliminate the weeds. Use them together for professional looking results!

DeWitt Edge is a great solution for almost any area where mulch needs to stay in, and grass needs to stay out. Made from flexible high-strength material, this edging offers extreme versatility for homeowners and landscapers alike.

Use it surrounding trees, shrubs, flowerbeds, vegetable gardens, walkways – wherever edging is desired.

Biodegradable E-Staples

E-Staples are comprised of a natural plastic that originate from materials that are abundantly grown in the United States. E-Staple composition is Polyhydroxyalkanoate (PHA) plastic that is made from plant sugars and oils. "Natural plastics" eliminate the use of petroleum-based materials, which ultimately helps reduce our dependency on oil.

Green Fabric Pins & Red Re-Pins™

Green Fabric Pins are made from recycled plastic. They are non-corrosive, sturdy, easy to install and reusable. Fabric Pins can be used to secure landscape fabrics, erosion control products and plant protection products. For best results, pins should be spaced every 2' to 3' around outside edges. For lighter weight products, it is highly recommended to fold over edge and push pin through double-layered material.

Re-pins™ are the ideal anchors for temporary coverings such as DeWitt Plant and Seed Guard, Overwinterized fabrics and N-Sulate cold weather plant protector. These nonpermanent stakes are easy to install and remove. Re-pins™ are UV-treated with highly visible red plastic and durable enough for hundreds of uses.

Tree Rope / Poly Twine

Tree Rope is made of polypropylene that won't rot and is UV-treated to resist deterioration and is reusable. Its flat, snake-like form will not girdle trees like conventional ropes – no need for turn buckles or vinyl garden hose. Twines are used for garden, home, office and packaging.
