fencing

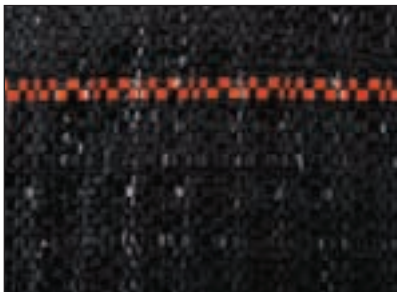

DeWitt fencing products are the most commonly used fabric for erosion control in commercial and residential construction projects as well as the protection of plants and animals. Whether you are creating a natural barrier for your garden or blocking sediment from being washed into local streams, DeWitt fencing products are designed for long lasting durability.

Down to earth protection. Down to earth results.

Silt Fence Benefits

- Designed to block sediment
- Made from woven polypropylene
- Allows water to flow through
- Commercial or residential uses
- Protects streams and rivers
- Helps protect fish and aquatic life

Silt Fence

Silt Fence

Silt Fence is the most commonly used fabric for erosion control in residential and commercial construction. DeWitt Silt Fence is made of woven polypropylene yarns, which is designed to block the sediment while letting the water slowly flow through the fabric. If properly installed, it can control sediment from being washed into streams and rivers, which results in killing fish and other aquatic life.

Deer Fencing

Deer Fencing is a safe, humane alternative to wire fencing. It discourages deer and other small animals from destroying gardens and other vegetation. Deer Fencing is an environmentally safe mesh netting made from polypropylene strands bonded together. With a 3/4" hole opening, it is UV-treated for longer lasting durability. It attaches easily to metal or wooden stakes.
