# plant protection

DeWitt's crop protection and over-winterized fabrics provide a protective environment for your plants during cold seasons. Don't take a chance when winter weather threatens. Protect your crops with DeWitt winterization fabrics.

**Down to earth protection. Down to earth results.**

## Crop Protection & Over Winterized Fabrics

### **Deluxe**

This .5 oz. fabric keeps temperatures up to 4° higher than outside conditions and creates an excellent micro-environment for seed germination and seedling growth. In fact, this fabric provides 90-95% average seed germination compared to a 60-65% average with straw.

### **Deluxe Plus**

This 1 oz. fabric protects vegetation from frost by raising temperatures beneath the fabric by 4° to 6°. In addition to providing protection against cold, wind, birds, insects and scorching sun, Deluxe Plus helps produce larger, earlier and more productive yields.

### **Supreme**

This 1.5 oz. fabric is ideal for protecting flowering annuals, bedding plants and vegetables from severe cold and freezing. Temperatures underneath the fabric are 6° to 8° warmer than outside conditions. Want to lengthen your harvest time and extend your flowering season? Then use DeWitt's Supreme Crop Protection Fabric.

### **Ultimate**

This ultimate 3 oz. fabric provides freeze protection 10° or greater than outside conditions. DeWitt's Ultimate is the most durable, effective product available on the market for "all winter" protection of your perennials and other ornamentals.

Designed to hold in heat and allow irrigation and rain to pass through, this fabric will not cause foliage burn even on sunny days.

"Because freezing weather can hit at a moment's notice, we encourage our customers to be prepared with DeWitt Overwinterized Fabrics. These fabrics not only protect your plants, they extend your growing season – as well! As is the case with all of our products, this protection is just a phone call away."

— **Larry DeWitt, Founder & CEO**

Burlap used as a tree wrap at a nursery.

Thermal Blankets used at a garden center.

Plant Protection used as crop row cover.

Plant & Seed Guard used for germination.

## N-Sulate

DeWitt's 1.5 ounce N-Sulate is a medium weight, permeable, UV-treated fabric designed to protect flowering annuals, bedding plants and vegetables from the severe cold and freezing temperatures. This fabric installs easily and is reusable. N-Sulate can lengthen your harvest time and extend your flowering season.

## Plant & Seed Guard

DeWitt Plant & Seed Guard is a lightweight, .5oz, white, spunbond fabric for use in grass seeding in commercial and residential sites. It creates an excellent microenvironment for seed germination and seedling growth. This fabric provides a 90-95% average seed germination compared to 60-65% with straw or hay and can be used as a low cost insulation against the elements.

## Thermal Blanket

DeWitt's Thermal Blanket is a white, non-woven, needle-punched polypropylene material. Thermal Blanket is designed to let rain and irrigation through to your nursery stock, while holding in precious heat. Due to the fabric's permeability, there is no need to worry about foliage burn, so Thermal Blanket can remain in use even on sunny days. This is an excellent product for late fall and early spring applications to extend your selling seasons. Thermal Blanket also makes an effective alternative for over-wintering perennials and other ornamentals. When it's cold out, choose DeWitt's Thermal Blanket.

## Natural Burlap

Our top-quality, medium-weave burlap is the biodegradable, economically sound choice for hundreds of uses around the home. Our Natural Burlap is ideal for soil erosion control, plant protection, wind screen, tree wraps and arts & crafts.

## Deluxe Natural Burlap

Deluxe Natural Burlap is the biodegradable choice of professionals for home and garden applications. Deluxe Natural Burlap is stonger and sturdier with a tighter weave.
